EDITORIAL REVIEW

Antibody-coated bacteria in urinary tract infections. *Virginia L. Thomas and Marvin Forland* .. 1

LABORATORY INVESTIGATION

On the mechanism of diminished urinary carbon dioxide tension caused by amiloride. *Henry N. Hulter, Leon P. Ilnicki, J. Hamilton Licht, and Anthony Sebastian* 8

Effect of potassium depletion on renin release. *Robert G. Luke, Richard H. Lyerly, John Anderson, John H. Galla, and Theodore A. Kotchen* 14

Diminished vascular response to noradrenaline in experimental chronic uremia. *Wolfgang Rascher, Albert Schömig, Volker A. Kreye, and Eberhard Ritz* 20

Ultrafiltration coefficient and glomerular capillary resistance in a model of immune complex glomerulonephritis. *Virginia J. Savin, Herbert B. Lindsley, Raymond B. Nagle, and Richard Cachia* 28

Altered glomerular permeability induced by $F(ab')_2$ and Fab' antibodies to renal tubular epithelial antigen. *David J. Salant, Michael P. Madaio, Stephen Adler, Magda M. Stilmant, and William G. Couser* 36

Effect of protamine on the permeability and structure of rat peritoneum. *Nahid Alavi, Elias Lianos, Giuseppe Andres, and Carl J. Bentzel* 44

Cis-diamminedichlorplatinum-induced acute renal failure in the rat. *Shreekant Chopra, James S. Kaufman, Thomas W. Jones, Waun K. Hong, Marc K. Gehr, Robert J. Hamburger, Walter Flamenbaum, and Benjamin F. Trump* 54

CLINICAL INVESTIGATION

Circulating vitamin D metabolite concentrations in childhood renal diseases. *Russell W. Chesney, Alan J. Hamstra, Richard B. Mazess, Philip Rose, and Hector F. DeLuca* 65

Angiotensin-induced sodium excretion patterns in cirrhosis: Role of renal prostaglandins. *Elias A. Lianos, Nahid Alavi, Morris Tobin, Rocco Venuto, and Carl J. Bentzel* 70

Analysis of survival of end-stage renal disease patients. *John M. Weller, Friedrich K. Port, Richard D. Swartz, C. William Ferguson, George W. Williams, and John F. Jacobs, Jr.* 78

Parathyroid hormone, prolactin, and function of the pituitary-gonadal axis in male patients with acute renal failure. *Franciszek Kokot, Zofia Mleczko, and Andrzej Pazera* 84

Effects of calcitriol administration on calcium metabolism in healthy men. *Nancy D. Adams, Richard W. Gray, Jacob Lemann, Jr., and Herman S. Cheung* 90

Plasma aldosterone concentrations in chronic renal disease. *Ronald J. Hené, Peter Boer, Hendrik A. Koomans, and Evert J. Dorhout Mees* 98

TECHNICAL NOTE

Kinetics of protamine-herapin complex formation in rat glomeruli during renal perfusion. *John R. Hoyer, Thomas E. Krueger, and Marcel W. Seiler* 102

Hematuria: A simple method for identifying glomerular bleeding. *Kenneth F. Fairley and Douglas F. Birch* 105

NEPHROLOGY FORUM

Chronic glomerulonephritis: Nonimmunologic mechanisms of progressive glomerular damage. *David S. Baldwin* 109

ABSTRACTS

French Society of Nephrology, May 11, 1981 121

American Society of Nephrology, November 22–24, 1981 127

EDITORIAL REVIEW

Mechanism of osmosis. *Fredrik Kiil*. 303

LABORATORY INVESTIGATION

Internephron heterogeneity of filtration fraction and disparity between protein- and hematocrit-derived values. *Bruce Jackson and Donald E. Oken*. 309

Effects of salt intake and renal denervation on catecholamine catabolism and excretion. *Andrew DeWitt Baines*. 316

Prolongation of canine allograft survival with donor pretreatment. *Henri L. F. Brom, Peter J. C. van Breda Vriesman, and Johan L. Terpstra*. 323

Attenuated pressure natriuresis in hypertensive rats. *Stephen G. Rostand, Dorothy Lewis, Joyce B. Watkins, Wann-Chu Huang, and L. Gabriel Navar*. 330

Progress in isolation and purification of an inhibitor of sodium transport obtained from dog urine. *Amnon Licht, Stanley Stein, Courtney W. McGregor, Jacques J. Bourgoignie, and Neal S. Bricker*. 339

Effects of in vitro potassium on ammoniagenesis in rat and canine kidney tissue. *Raymond S. Sleeper, Pierre Belanger, Guy Lemieux, and Harry G. Preuss*. 345

Uptake and intracellular distribution of ferritin in the rat distal convoluted tubule. *Kirsten M. Madsen, Robert H. Harris, and C. Craig Tisher*. 354

CLINICAL INVESTIGATION

Comparison of pituitary-thyroid function in patients with end-stage renal disease and in age- and sex-matched controls. *Faith B. Davis, David A. Spector, Paul J. Davis, Barbara R. Hirsch, J. Joseph Walshe, and Katsumi Yoshida*. 362

Role of renal prostaglandins during antidiuresis and water diuresis in man. *Rebecca M. Walker, Robert S. Brown, and Jeffrey S. Stoff*. 365

Abnormal relationship between sodium intake and sympathetic nervous system activity in salt-sensitive patients with essential hypertension. *Vito M. Campese, Mark S. Romoff, Daniel Levitan, Yahya Saglikes, Robert M. Friedler, and Shaul G. Massry*. 371

Partial biochemical and physicochemical characterization of organic macromolecules in urine from patients with renal stones and control subjects. *Tadaichi Kitamura, Joseph E. Zerwekh, and Charles Y. C. Pak*. 379

Glomerular localization of circulating antiglobulin activity in essential mixed cryoglobulinemia with glomerulonephritis. *Q. Maggiore, F. Bartolomeo, A. L'Abbate, V. Misefari, C. Martorano, A. Caccamo, G. Barbiano di Belgiojoso, A. Tarantino, and G. Colasanti*. 387

Effects of water immersion on renal function in the nephrotic syndrome. *Gollapudi G. Krishna and Gabriel M. Danovitch*. 395

Systemic and renal acid-base effects of chronic dietary potassium depletion in humans. *James W. Jones, Anthony Sebastian, Henry N. Hulter, Morris Schambelan, James M. Sutton, and Edward G. Biglieri*. 402

Dialysate aluminium concentration and renal bone disease. *Geoffrey S. Walker, J. E. Aaron, M. Peacock, P. J. A. Robinson, and A. M. Davison*. 411

TECHNICAL NOTE

Sorbent regenerative hemodialysis as a potential cause of acute hypercapnia. *L. Lee Hamm, Gail Lawrence, and Thomas D. DuBose, Jr.*. 416

SPECIAL PRESENTATION

Diagnostic advances and trends in modern nephrology. *George E. Schreiner*. 419

NEPHROLOGY FORUM

Infection-induced renal calculi. *Donald P. Griffith*. 422

ANNOUNCEMENTS 431

Table of contents

LABORATORY INVESTIGATION

Effect of calcium and phosphate on bicarbonate and fluid transport by proximal tubules in vitro. *Thurman D. McKinney and Patti Myers*. 433

Effects of acute metabolic acidosis on renal, gut, liver, and muscle metabolism of glutamine and ammonia in the dog. *Adrian Fine*. 439

Renal and systemic acid-base effects of the chronic administration of hypercalcemia-producing agents: Calcitriol, PTH, and intravenous calcium. *Henry N. Hulter, Anthony Sebastian, Robert D. Toto, Ernest L. Bonner, Jr., and Leon P. Ilnicki*. 445

The glomerular filtration rate of isogeneically transplanted rat kidneys. *Abraham P. Provoost, Marinus H. de Keijzer, Wil J. Kort, Erik D. Wolff, and Jan C. Molenaar*. 459

Actions of angiotensin II on the isolated spontaneously hypertensive rat kidney. *Thomas H. Steele, Jeanne H. Gottstein, Laura Challoner-Hue, and Johnnie L. Underwood*. 466

Parathyroid hormone-independent adaptation of the renal handling of phosphate in response to renal mass reduction. *Joseph Carverzasio, Hans-Jakob Gloor, Herbert Fleisch, and Jean-Philippe Bonjour*. 471

CLINICAL INVESTIGATION

Distal nephron function in patients receiving chronic lithium therapy. *Daniel Batlle, Moises Gaviria, Marlene Grupp, Jose A. L. Arruda, John Wynn, and Neil A. Kurtzman*. 477

Progressive encephalopathy in children with chronic renal insufficiency in infancy. *Alberto Rotundo, Thomas E. Nevins, Meryl Lipton, Lawrence A. Lockman, S. Michael Mauer, and Alfred F. Michael*. 486

Anthropometry and plasma valine, amino acids, and proteins in the nutritional assessment of hemodialysis patients. *Gerald A. Young, Charles R. Swanepoel, Martyn R. Croft, Shirley M. Hobson, and Frank M. Parsons*. 492

Amino acid losses during hemodialysis with infusion of amino acids and glucose. *Marsha Wolfson, Michael R. Jones, and Joel D. Kopple*. 500

Circulating immune complexes in idiopathic glomerular disease. *Stephen A. Cairns, R. Anson London, and Netar P. Mallick*. 507

Acetate and bicarbonate fluctuations and acetate intolerance during dialysis. *Mark D. Pagel, Suhail Ahmad, Joseph E. Vizzo, and Belding H. Scribner*. 513

TECHNICAL NOTES

Changes in plasma oncotic pressure during isolated ultrafiltration. *Mariano Rodriguez, Francisco Llach, James A. Pederson, and Alfonso Palma*. 519

Fluorescence assay for picomole quantities of ammonia. *Edmund A. Mroz, Richard J. Roman, and Claude Lechene*. 524

NEPHROLOGY FORUM

Glomerulosclerosis in reflux nephropathy. *Ramzi S. Cotran*. 528

ANNOUNCEMENTS 535

KIDNEY INTERNATIONAL

Volume 21, Number 4, April 1982

Official Journal of the International Society of Nephrology

Table of contents

EDITORIAL REVIEW

The role of the kidney in sodium homeostasis during maturation. *Adrian Spitzer* 539

LABORATORY INVESTIGATION

Differential effects of acute mineralo- and glucocorticosteroid administration on renal acid elimination. *Christopher S. Wilcox, Dusan A. Cemerikic, and Gerhard Giebisch* 546

Antibodies to tubular basement membrane elicited by stimulation with allogeneic kidney. *Tetsuzo Sugisaki, Kyoichi Kano, Giuseppe Andres, and Felix Milgrom* 557

Altered glomerular permeability as a result of focal detachment of the visceral epithelium. *Yashpal S. Kanwar and Lionel J. Rosenzweig* 565

Formation and clearance of tubulointerstitial immune complexes in kidneys of rats immunized with heterologous antisera to Tamm-Horsfall protein. *Jeffrey Friedman, John R. Hoyer, and Marcel W. Seiler* 575

Renal concentration defect following nonoliguric acute renal failure in the rat. *Robert J. Anderson, Joel A. Gordon, Jin Kim, Linda M. Peterson, and Peter A. Gross* 583

Acid-base and metabolic responses to anion infusion in the anesthetized dog. *Ronald L. Wathen, Richard A. Ward, George B. Harding, and Linda C. Meyer* 592

Complete protection from gentamicin-induced acute renal failure in the diabetes mellitus rat. *Ruth Bier Teixeira, Jan Kelley, Helen Alpert, Victoriano Pardo, and Carlos A. Vaamonde* 600

Effects of two models of hypercalcemia on renal acid base metabolism. *Paul Mitnick, Arthur Greenberg, Thomas Coffman, Ellie Kelepouris, Charles J. Wolf, and Stanley Goldfarb* 613

CLINICAL INVESTIGATION

Prednisone and prednisolone bioavailability in renal transplant patients. *John G. Gambertoglio, Felix J. Frey, Nicholas H.G. Holford, Jytte L. Birnbaum, Patricia Stanik Lizak, Flavio Vincenti, Nicholas J. Feduska, Oscar Salvatierra, Jr., and William J.C. Amend, Jr.* 621

Reduced plasma concentration of 1,25-dihydroxyvitamin D in children with moderate renal insufficiency. *Anthony A. Portale, Beverley E. Booth, Huan C. Tsai, and R. Curtis Morris, Jr.* .. 627

Mechanisms of proteinuria in diabetic nephropathy: A study of glomerular barrier function. *Bryan D. Myers, Jan A. Winetz, Francis Chui, and Alan S. Michaels* 633

Absence of nephritogenic GBM antigen(s) in some patients with hereditary nephritis. *Ralph C. McCoy, H. Keith Johnson, William J. Stone, and Curtis B. Wilson* 642

TECHNICAL NOTES

Measurement of osmolality in kidney slices using vapor pressure osmometry. *Mark A. Knepper* 653

A colorimeter for measurement of picomole quantities of urea. *Gerald G. Vurek and Mark A. Knepper* 656

NEPHROLOGY FORUM

Prognostic indicators in childhood urinary infections. *Lars A. Hanson* 659

ABSTRACTS

Table of contents

SYMPOSIUM ON DIABETES MELLITUS

Introduction: Diabetes mellitus and the kidney. *Carl Erik Mogensen* 673

Effects of early diabetes on uridine diphosphosugar synthesis in the rat renal cortex. *Pedro Cortes, Francis Dumler, K. S. Sury Sastry, Chacko P. Verghese, and Nathan W. Levin* 676

Kidney function and size in diabetics before and during initial insulin treatment. *Jens Sandahl Christiansen, Jens Gammelgaard, Bente Tronier, Per Aaby Svendsen, and Hans-Henrik Parving* . 683

Development of glomerular lesions in experimental long-term diabetes in the rat. *Kenji Hirose, Ruth Østerby, Masumi Nozawa, and Hans Jørgen G. Gundersen* 689

Glomerular filtration rate and extracellular fluid volume in insulin-dependent patients with diabetes mellitus. *Jens Brøchner-Mortensen and Jørn Ditzel* 696

Glomerular permeability to neutral and anionic dextrans in experimental diabetes. *Lester D. Michels, Morris Davidman, and William F. Keane* 699

Renal extraction ratios for ^{51}Cr-EDTA, PAH, and glucose in early insulin-dependent diabetic patients. *Gudrun Nyberg, Göran Granerus, and Mattias Aurell* 706

Pattern of urinary proteins in experimental diabetes. *J. Phillip Pennell and Terri L. Meinking* ... 709

Proteinuria in diabetes mellitus: Role of spontaneous and experimental variation of glycemia. *GianCarlo Viberti, David Mackintosh, Rudolf W. Bilous, John C. Pickup, and Harry Keen* 714

Diabetic nephropathy in the uninephrectomized dog: Microscopic lesions after one year. *Michael W. Steffes, Henry Buchwald, Bruce D. Wigness, Thomas J. Groppoli, William M. Rupp, Thomas D. Rohde, Perry J. Blackshear, and S. Michael Mauer* 721

Graded exercise and protein excretion in diabetic man and the effect of insulin treatment. *Erik Vittinghus and Carl Erik Mogensen* 725

The kidney in maturity onset diabetes mellitus: A clinical study of 510 patients. *Jean Fabre, Luc P. Balant, Pierre G. Dayer, Hilke M. Fox, and André T. Vernet* 730

Low risk of contrast media-induced acute renal failure in nonazotemic type 2 diabetes mellitus. *Shang Der Shieh, Sondra R. Hirsch, Burris R. Boshell, Jorge A. Pino, Larry J. Alexander, David M. Witten, and Eli A. Friedman* 739

Biochemistry of glomerular basement membrane of the normal and diabetic human. *Peter Wahl, Dieter Deppermann, and Christoph Hasslacher* 744

Glomerular function in advanced human diabetic nephropathy. *Jan A. Winetz, Helen V. Golbetz, Robin J. Spencer, Jeri A. Lee, and Bryan D. Myers* 750

LABORATORY INVESTIGATION

Mechanism of the decreased renal blood flow in the potassium-depleted conscious rat. *Stuart L. Linas and David Dickmann* 757

Immunocytochemical localization of vitamin D-dependent calcium-binding protein in renal tubules of rabbit, rat, and chick. *Alan N. Taylor, James E. McIntosh, and James E. Bourdeau* 765

Glutamine distribution in mitochondria from normal and acidotic rat kidneys. *David P. Simpson and Jonnell Hecker* 774

NEPHROLOGY FORUM

Diabetic nephropathy: Strategies in prevention and management. *Eli A. Friedman* 780

ANNOUNCEMENTS 792

Table of contents

LABORATORY INVESTIGATION

Elevated urinary P_{CO_2} in the rat: An intrarenal event. *Mark L. Graber, Howard H. Bengele, and Edward A. Alexander* 795

Antigenic determinants of tubular basement membranes and Bowman's capsule in rats. *Leendert C. Paul and Charles B. Carpenter* 800

Effect of iron on acute pyelonephritis and later chronic changes. *Lucien B. Guze, Phyllis A. Guze, George M. Kalmanson, and Richard J. Glassock* 808

In vivo effect of cellular calcium uptake on osmotic and nonosmotic release of arginine vasopressin. *San-e Ishikawa, William A. Handelman, Robert W. Schrier, and Tomas Berl* 813

Sodium homeostasis in dogs with chronic renal insufficiency. *Jacques J. Bourgoignie, Michael Kaplan, George Gavellas, and David Jaffe* 820

CLINICAL INVESTIGATION

Lymphocyte and granulocyte function in zinc-treated and zinc-deficient hemodialysis patients. *William A. Briggs, Margaret M. Pedersen, Sudesh K. Mahajan, Dale H. Sillix, Ananda S. Prasad, and Franklin D. McDonald* 827

Quantitative bone histology in children with chronic renal failure. *Elisabeth M. Hodson, Richard A. Evans, Colin R. Dunstan, Ellen E. Hills, and Pamela F. Shaw* 833

Pain, control over treatment, and compliance in dialysis and transplant patients. *Yitzchak M. Binik, Andrew G. Baker, Dennis Kalogeropoulos, Gerald M. Devins, Ronald D. Guttmann, David J. Hollomby, Paul E. Barré, Tom Hutchison, Michel Prud'Homme, and Lise McMullen* 840

Metabolic balance studies and dietary protein requirements in patients undergoing continuous ambulatory peritoneal dialysis. *Michael J. Blumenkrantz, Joel D. Kopple, John K. Moran, and Jack W. Coburn* 849

Minerals, vitamin D, and parathyroid hormone in continuous ambulatory peritoneal dialysis. *James A. Delmez, Eduardo Slatopolsky, Kevin J. Martin, Barbara N. Gearing, and Herschel R. Harter* .. 862

Hemodynamic study of hypotension during hemodialysis. *Jean-Pierre Kinet, Daniel Soyeur, Noëlle Balland, Michel Saint-Remy, Pierre Collignon, and Jean-Pierre Godon* 868

TECHNICAL NOTE

Choline kinase activity along the rabbit nephron. *Gabriele Wirthensohn, Alain Vandewalle, and Walter G. Guder* 877

SPECIAL PRESENTATION

Sodium homeostasis: Steady states without a set point. *Joseph V. Bonventre and Alexander Leaf* .. 880

Surfeit, deficit, and the set point for sodium homeostasis. *Norman K. Hollenberg* 883

Response of Drs. Bonventre and Leaf. *Joseph V. Bonventre and Alexander Leaf* 885

NEPHROLOGY FORUM

Sodium homeostasis in chronic renal disease. *Neal S. Bricker* 886
